November 7, 2018

To the RM of Cartier Customers:

The Cartier Regional Water Co-op staff and the RM of Cartier staff met today to review a plan of action to help remove the brown water from the distribution lines in Lido Plage and surrounding areas. The CRWC has open a flushout at the end of Cabot Rd. to clear the discoloured water from the co-op lines. Once that is cleared the RM of Cartier will be opening endpoints and/or flushouts in the area along the municipal distribution system to help direct the brown water out of the pipelines. The execution of this plan started today, November 7, 2018, and will continue until we are confident the water quality has improved. We again apologized for this inconvenience.

Virginia Beckwith
CAO, RM of Cartier

Danielle Vaillant
CRWC Manager
